

# Barkey **S-line C&G**

## Reliable Fluid Path Warmer

► Warms fluids like cell culture media as well as blood and cellular products used in laboratories and manufacturing.

► One preset temperature for easy operation.

► Alerts user with a visual and acoustic alarm in the event of an error.

► One-touch control and no additional disposables required.

## Safety

- Integrated temperate sensors
- Overtemperature alarms
- Smooth surfaces allow for easy disinfecting procedures
- Provides operational safety feature due to preset target temperature value

## Application

A safe and reliable system which helps support the warming of cellular products through all steps of tech transfer. The Barkey S-line C&G is applicable for C&G Research & Development up to the point of manufacturing.

## Wide range of services

- Installation Qualification (IQ)
- Operational Qualification (OQ)
- Performance Qualification (PQ)
- Preventive Maintenance (PM)

Product	Barkey S-line C&G
Power supply	100-240 V 50/60 Hz
Power consumption	115-139 VA
Set temperature	+39°C
Length warming sleeve	1.5 m
For I.V. set diameter	5 mm
Access Line	3 m
Weight	approx. 1.3 kg
Protection Class	I, protective earthing
Moisture protection	IP X2
Certification	CE

MANUFACTURED BY:  
**Barkey GmbH & Co. KG**  
Technical amendments and errors excepted.
